Great game!. Cool little game!. Everything's wrong in this game, it just ♥♥♥♥ing sucks.. Thanks for all the updates guys. <3. Useful, easy and they are openedmind to recibe feedback, that's why every upgrade is better!
Thanks!

A really fun puzzler game. Unfortunately it does not support full screen mode. I got it on a huge sale when I bought the EQ Games Puzzly Pack on a big discount. I suggest you do the same because the full price is too much for it. But if you get it on a discount, it is really worth it's money.. Best Christmas I've had in years.. If you are incredibly drunk or incredibly high RIGHT NOW, and this game is on sale, then this might be the game for you.. OK twin-stick move 'n shoot.. Claws & Feathers 2 is an engaging match 3 puzzle game boasting colourful super cute graphics and plenty of level variety.

I've completed the game and didn't encounter any bugs or crashes (W7 64bit).

This is a quality title. Highly recommended.
. It was sold at a really low price but on the other hand, it was a rather bad game even though it held a rather high pace throughout the whole game. The AI was close to abysmal - both friendly and enemy AI - and the levels were basically multiplayer levels with some story attached to it... much like the single player part of Battlefield 1942 (except that game had no story at all).

In short, it was not a really good game.. You control Freesia who is tasked with getting the enemies out of the forest.

You run around an enclosed area attacking mobs of creatures and then a boss. After that, the sceen goes into a dialog with the many lead villians as they explain why they need to do what they are doing. Whether it is to acquire an item from the heart of the forest or just following the wishes of their master. Each group tries to destroy the forest.

Each level is a snipet of a scene where you have to take out creatures quickly. As the levels progress things get faster and more chaotic.

The storyline is decent, the music is fine, the graphics are really nice. The one thing that hinders this game is the enclosed repatative locations. Based off the pictures you would expect this to be an open and vivid game. Getting trapped in a small location with the same creatures respawning gets old real quick. The locations will eventually change but you will be locked into those for a while also.
. 5 Gb of nausea. Man, there are a lot of resources to prevent nausea on VR games development, seems like you are using just none of them.

Here some examples:

Make something fix at the screen, like a virtual nose, as point of reference.

Make the way to transport through your scene by small teleporting/jumping

Make the user move somehow to move around the scene, don't allow them to just sit and use a joystick control.

Do something! 5Gb of data to the trash can already. Sorry!
Without any of those any content within 7 min, you are ready to puke all over the place.. Very fun game, testing your reflexes' speed and accuracy. For those who want more challenge than just the levels, you can see other players' score and try to improve your ranking.
Easy to play, hard to master
